

GLODON SEA IN-FOCUS WEBINAR SERIES

RETURN ON INVESTMENT FOR BIM TECHNOLOGY

CERTIFICATION WEBINAR

Nov 30th, 2021

Zoom Live on 15:00 PM - 16:30PM [GMT+8]

ABOUT THE WEBINAR

Anyone familiar with BIM (Building Information Modelling) will tell you that moving to an intelligent 3D-modeling workflow requires an investment. But how do you know if you're getting the right digital tools to improve your QTO (quantification) & Cost Management process and ensure it worth for the investment?

Many leading firms count on innovative BIM construction technologies to help them to be more efficient and to stay ahead of the competition by adopting BIM & 5D BIM Digital technologies throughout the building project lifecycle. The role of Return on Investment for BIM Technology therefore become mandatory for every construction firm.

This webinar will walk you through on the various factors that leading firms have considered for investment return on BIM technology, revealing how does 5D BIM work and how 5D BIM have added value over time.

Advance your QTO (quantification) & Cost Management process with right digital tools.

ABOUT THE WEBINAR

Contract Managers, QS Managers, Project Managers, BIM Managers, Cost Estimators, Quantity Surveyors, BIM Modelers, AEC Professionals and Finance Professionals of Construction Organization.

WEBINAR AGENDA

Impacts on business for BIM investment

Identify key investment areas for BIM implementation in construction firms

How Cubicost 5D BIM Digital Cost Management Solution help to maximise BIM investment return and achieve more benefits

Live Q&A

WEBINAR SPEAKER

Sr Nazirul previously was a Senior Project Executive at various top construction companies. He is also a registered Quantity Surveyor under a statutory body of Board of Quantity Surveyors Malaysia (BQSM) and a member of Royal Institution of Surveyors Malaysia (RISM).

Prior joining Glodon, he has intensively involved throughout the construction phases of various projects such as mixed development projects, industrial buildings and infrastructures such as Mass Rapid Transit (MRT) project. He is now focusing on developing the AEC industry across Asia region towards digital environment. Graduated with Bachelor Degree of Quantity Surveying (Hons) then furthered his studies to Master of Project Management. Currently, he is doing his PhD concentrating on research of infrastructure projects and digital construction.
