## Have Your Say on Future...

Digital transformation has become a major theme in the business world, but the construction industry has been slow to adopt new technology compared to other sectors. Faced with a volatile market, the industry must respond and adapt before too late. To help construction professionals better understand the status quo of the industry and the global market, **Glodon is cooperating with Alpha Property Insight to conduct this survey on the role of technology in the industry. As a stakeholder, your view is precious.** We would be very grateful if you can spend a couple of minutes participating. Together we can help our industry thrive and create better built environment for all.

Shenzhen World Exhibition & Convention Center is set to become the largest exhibition space in the world upon its completion of all phases.

As the world's 1st construction project integrating large-scale building construction, transportation development, water conservancy engineering and civil engineering simultaneously, it is characterized by a tough schedule and heavy workload. See how Glodon products facilitate this mega project's quality, safety, and schedule management.

The Global Construction Summit, a key annual event for built environment professionals, was held virtually on 22-24 February 2022. Mr Pierpaolo Franco, Glodon Vice President International Business Development, joined a session discussion on digitalization of the construction industry and BIM 5D implementation.

Held by the Chartered Institute of Building (CIOB) and Global Construction Review, the summit seeks to understand the latest trends, learn best practices, uncover innovations and address common issues that the sector's professionals face worldwide; nearly 1,500 construction professionals registered for the summit.
