Building Sustainability, Digitally: How Technology is Shaping the Future of Construction

Glodon Introduces Gsite 2.0 for Better Construction Management at Digital Construction Week

Glodon introduced a major upgrade of Gsite at Digital Construction Week in London on 17 May. The move is part of Glodon's ongoing effort to drive digital transformation in the construction industry. The latest Gsite 2.0 is the next-generation solution that takes digital construction management to a new level. Glodon also teamed up with nimo in an exclusive networking event, and our Vice President Pierpaolo Franco also highlighted the advancing sustainability by adopting digitalisation in his speech.
